

All-Welded Convertible 4-Wheel Hand Trucks

- All-welded, lightweight, extruded aluminum frame provides durability by eliminating racking.
- Foot pedal release allows you to convert the truck from a 2-wheel hand truck to a 4-wheel platform truck in just seconds.
- Lightweight, bolt-on cast aluminum shoe with built-in fender supports up to 600 lbs.
- Available in two sizes to meet all your load handling needs.

With two truck sizes available, choose the truck suited to your work environment.

Two trucks in one: the standard 2-wheeler converts to a 4-wheel platform truck for extra large loads.

5" x 1 1/8" swivel casters provide easy steering and maneuverability when in the platform truck position.

Both the **Dura-Lite II Junior** and **Dura-Lite II Senior** are constructed of all-welded, lightweight aluminum and feature a full 12" frame width to handle big loads, and a 20" overall width. The all-welded frame includes three cross-braces for added safety of load handling. Assembled with a 7 1/2 x 18" cast aluminum shoe, these trucks safely and easily handle up to 600 lbs.

Both styles roll over virtually any surface on 10" fully pneumatic tires mounted to a sturdy 5/8" axle. And both are equipped with 5" swivel casters for use as a 4-wheeler. The **Dura-Lite II Junior** measures 51" high and features a twin handle style. The **Dura-Lite II Senior** stands 61" tall and is equipped with a versatile continuous handle style.

Fully pneumatic tire.

Model Number	Wheel & Tire	Capacity	Shipping Weight
Continuous Handle Models — Standard Frame			
4972	Junior: 10 x 3" fully pneumatic tires, 5 x 1 1/4" swivel casters	600 lbs.	39 lbs.
4973	Senior: 10 x 3" fully pneumatic tires, 5 x 1 1/4" swivel casters	600 lbs.	42 lbs.
