A. Operating Instructions

NOTE: IT IS RECOMMENDED THAT ALL OPERATORS FAMILIARIZE THEMSELVES WITH THE MACHINE AND DEVELOP SAFE WORKING HABITS.

- 1. IMPORTANT!** Remove solid plug on hydraulic reservoir and install breather cap (included in the Power Pak) for proper air venting.
- Install battery with the negative pole on the left hand side (do not allow ground wire to come in contact with any other wires or a short will occur).
- Attach the desired Versa-Lift attachment to the backplate.
- To raise or lower the attachment use switch located on top of the control box.

B. Safety Information

- When transporting a load, it is recommended that the attachment is lowered as close to the floor as possible to reduce the chances of accidents during transport.
- Do not leave load suspended for an extended period of time or premature wear to the lifting cylinder will occur.
- Maximum lifting capacity is 1,000 pounds and this capacity is governed by the attachment capacity.

C. Maintenance Tips

1. Use 12 Volt deep-cycle batteries group 24 only.
3. Check hydraulic fluid every 40 hours or before using the machine after long set-aside periods. Three quarts of hydraulic fluid is sufficient to operate the system properly. Do not overfill. Use Dexron automatic transmission fluid only!
4. The lifting chain should be oiled periodically as needed. This is best accomplished by lowering the backplate completely and spraying lubricant onto the chain.

E. Battery Charging Instructions

1. Read charger operating instructions manual before charging.
2. Plug a grounded extension cord into built-in receptacle in Control Box and plug into outlet.
3. The Versa Lift is charged automatically, and can be left unattended while charging.
4. When re-charging is accomplished, unplug extension cord from Control Box.

NOTES:

- A. Generally, batteries will require equal charging to work time (ex. One hour of machine use = one hour of re-charging time).
- B. It is not recommended that alternate charging devices be used.
- C. To extend battery life, it is recommended that the batteries occasionally experience a full discharge. Doing this prevents the battery from developing a “memory” for lesser charge.
- D. **CAUTION!** To avoid shock or burn, **NEVER** touch the unit while recharging.

HMIS RATING

Health: 1; Flammability: 1; Reactivity: 0

Potential Health Effects

Primary Route of Entry: Skin

The product, as with many petroleum products, may cause minor skin, eye, and lung irritation, but good hygienic practices can minimize these effects.

Normal use of this product does not result in generation of an oil mist. However if an oil mist is generated, overexposure can cause minor and reversible irritation to the eyes, skin, and especially the lungs. Proper personal protective equipment and sufficient

ventilation can provide adequate protection.

Carcinogenicity Information

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

4. FIRST AID MEASURES

Inhalation

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

Skin Contact

Wash skin thoroughly with soap and water. If irritation develops and persists, consult a physician.

Eye Contact

In case of contact, immediately flush eyes with plenty of water at least 15 minutes. Call a physician.

Ingestion

Material poses an aspiration hazard. If swallowed, do not induce vomiting. Immediately give 2 glasses of water. Never give anything by mouth to an unconscious person. Call a physician.

If vomiting occurs naturally, have victim lean forward to reduce the risk of aspiration.

Notes to Physicians

Activated charcoal mixture may be administered. To prepare activated charcoal mixture, suspend 50 grams activated charcoal in 400 mL water and mix thoroughly. Administer 5 mL/kg, or 350 mL for an average adult.
